organizations (DAOs) and Web3 technology, is set to take place on August 21-22,

2024, at the historic Kanda Myojin Shrine in Tokyo, Japan. The event, organized by leading incubator Fracton Ventures, aims to spotlight Japan's growing influence in the Web3 space and bring together industry leaders from around the world.

The conference has already secured an impressive lineup of speakers, including representatives from prominent projects in the blockchain and DAO ecosystem. Confirmed participants include Anthony Leutenegger, CEO of Aragon; Tomasz Stanczak, CEO of Nethermind; Sejal Rekhan, Grants Innovation Specialist at Gitcoin; and Giorgio Donà-Danioni, Co-Founder of KlimaDAO. These industry experts are expected to share insights on the latest developments and trends in the DAO and Web3 sectors.

2023 highlights

DAO TOKYO 2024's program is designed to cover a wide range of topics crucial to the development and adoption of DAOs and Web3 technologies. Attendees can expect workshops, expert panels, and discussions on subjects such as cutting-edge trends in Web3 and cryptocurrency, regulatory frameworks for DAOs, advancements in decentralized finance (DeFi), decentralized physical infrastructure networks (DePIN), real-world asset (RWA) integration, DAO governance, and treasury management.

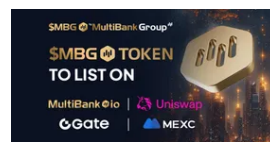

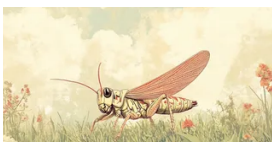

Toshi Kamei, Co-Founder of Fracton Ventures, highlighted the event's significance in light of recent trends. "Over the past year, we've seen a significant surge in the creation of tokens worldwide," Kamei stated. He elaborated that any project active on-chain, producing tokens, and managing a treasury could be considered a DAO in the broadest sense. Kamei emphasized the importance of token incentives in expanding ecosystem participation and positioned the event as a collective gathering for all token-issuing projects, regardless of their current DAO status.

The choice of Japan as the host country for this event is particularly noteworthy. In November 2022, Japan's digital ministry announced plans to convert its Web3 study group into a DAO, demonstrating the country's commitment to exploring and understanding Web3 capabilities. This initiative aims to encourage government investment and deepen comprehension of the technology's potential, making Japan an increasingly attractive destination for DAO enthusiasts and innovators.

DAO TOKYO 2024 is expected to play a crucial role in promoting collaboration and driving innovation in the DAO space. By bringing together a diverse array of industry pioneers and enthusiasts, the conference aims to amplify Asia's influence in decentralized autonomous organizations while providing a platform for global networking and knowledge exchange.
